

Date: 2nd July 2018

Title: Telesoft to exhibit at RSA Conference Asia 2018

Word Count: 249

Main Text:

Telesoft Technologies Ltd (<https://telesoft-technologies.com>) have announced their participation at the RSA Conference Asia (<https://www.rsaconference.com/events/ap18>) from the 25th to the 27th July, at the Marina Sands, Singapore. Over the course of the show the Asian Pacific and Japanese infosec industry will come together for three full days of industry know-how, unbeatable content and invaluable networking opportunities.

Exhibiting on Stand 2004, Telesoft will be demonstrating a range of cutting edge Carrier Scale Cyber Security Tools for National ISP/Telco, NSP and Large Enterprise, enabling real-time network indicators of compromise for Cyber Defence and Network Security teams, protecting network assets and brand.

- Systems are designed to dynamically scale in line with carrier scale network capacity.
- Map and correlate tens of millions of network connected IoT devices with their relevant IP address for security monitoring and behavioural analysis.
- Collection, visualisation and analysis tools provide real-time views of traffic patterns and user behaviour, and alert anomalies and indicators of compromise (IoC).
- Ability to adapt and modify functionality quickly.
-

Engineered for high density cyber environments, Telesoft can do what no other can solution can, deliver accurate data context at scale for rapid anomaly detection and incident response.

For more information about Telesoft carrier scale cyber tools, please contact the Telesoft sales team at sales@telesoft-technologies.com

We hope to see you at RSA Conference Asia 2018, so be sure to add the Telesoft Stand to your itinerary. If you would like to book a one to one meeting at the conference then please contact Sarah Chandley at schandley@telesoft-technologies.com

- Ends -

If you would like to find out more or would like to interview with any of the experts here at Telesoft, please contact Sarah Chandley on 01258 486541 or schandley@telesoft-technologies.com
