

SWIMMING WITH SHARKS

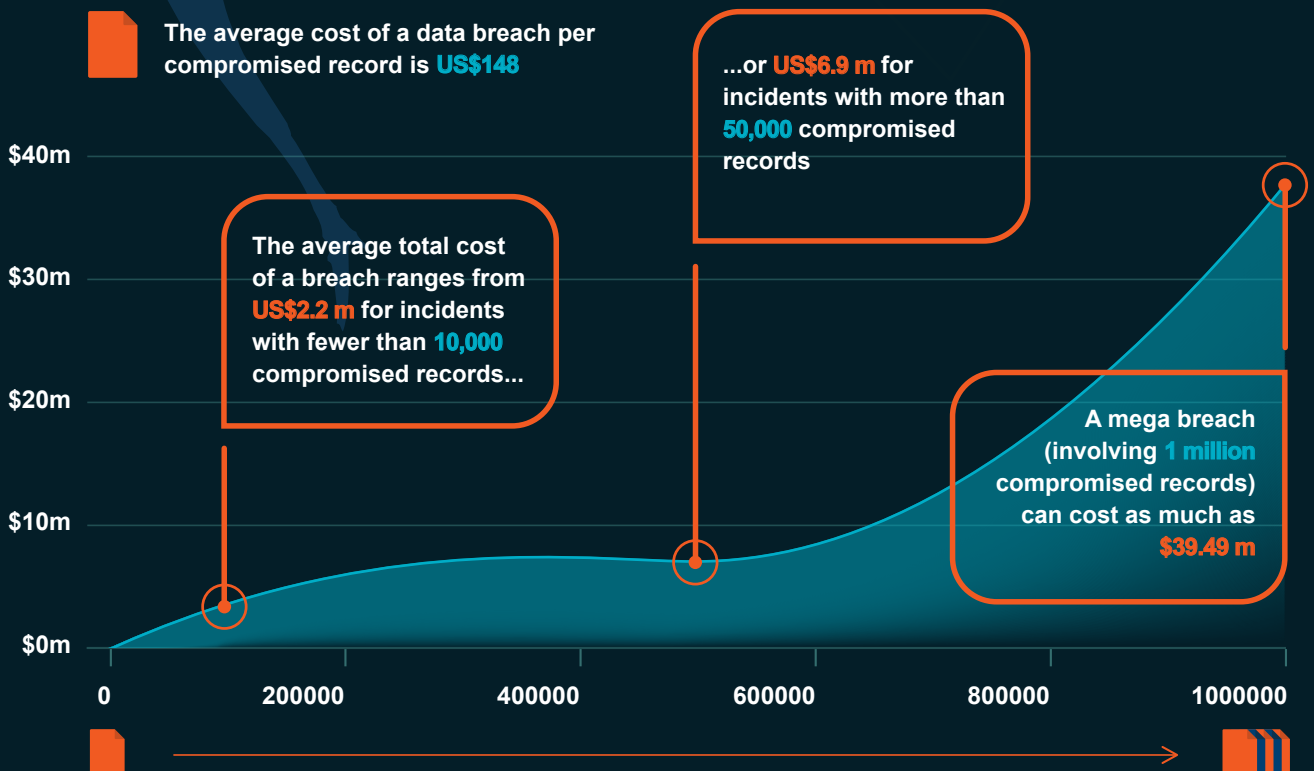

Since 2013,

9,728,017,988

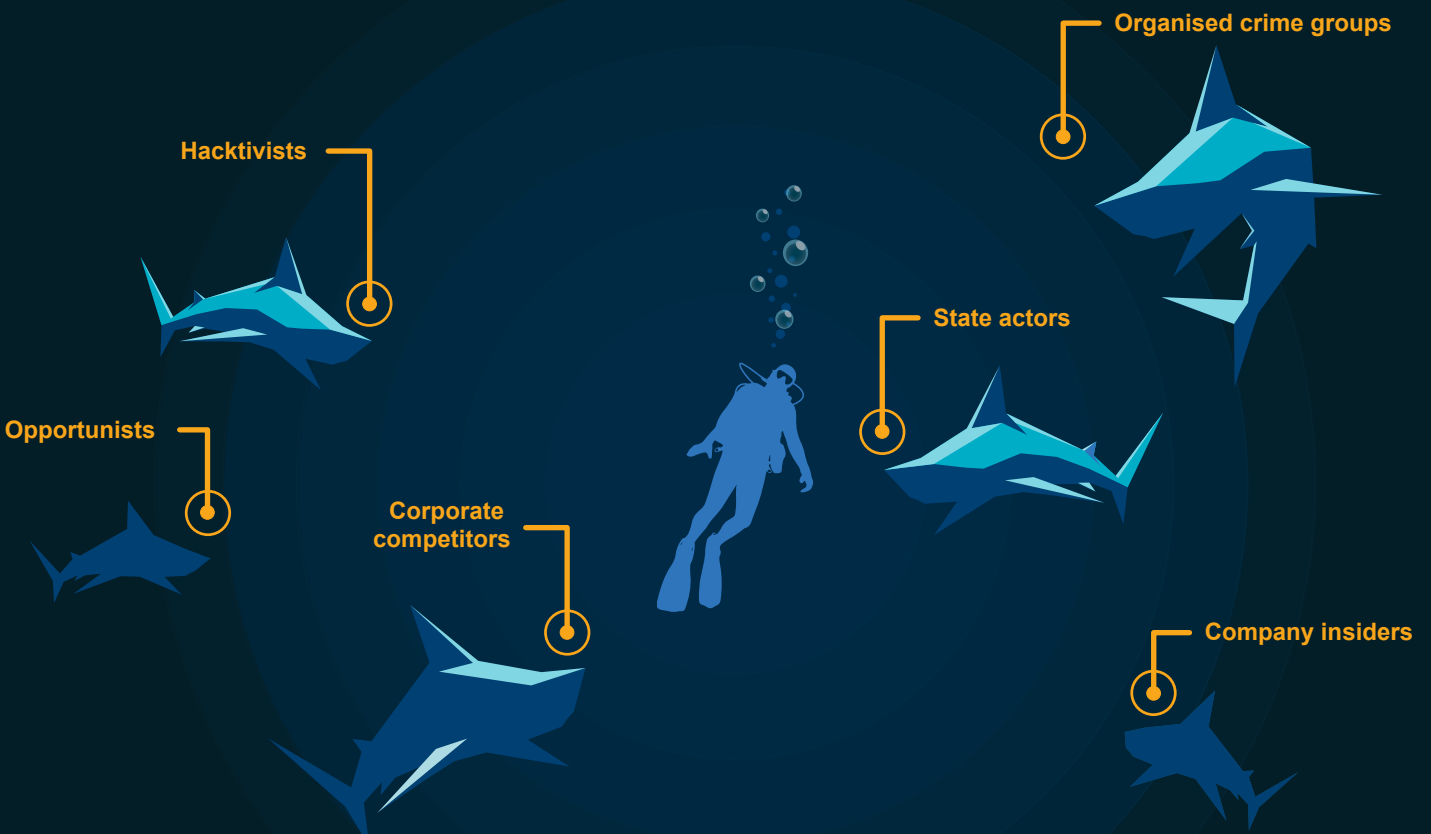

records have been stolen (Data Breach Index September 2018) at a rate of 194,405 every hour.

! These statistics underscore that just like their marine counterparts, these cyber sharks need to only be lucky once - enterprises need to be lucky all the time, every time

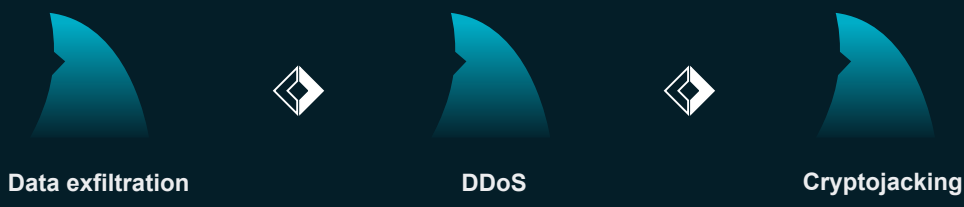

WHY? BECAUSE DATA BREACHES ARE EXPENSIVE

WHO ARE THE SHARKS?

WHAT ARE THE THREATS?:
